Subject: New Computers

Hi Warren,

The new computers that were ordered to upgrade our instruments have arrived (there currently locked up in the stockroom). I'm not sure what the next step should be. Do you want to format them with all of our internal software and settings before or after the instrument software has been loaded? There are two systems that we'd like to get up and running ASAP. One of the computers is for a GC/MS in the drug lab. We have a service engineer in on 6/14 and I'd like for that computer to be ready for the engineer to install the upgraded software on that date. Is this possible? The other computer is for a GC that is currently not hooked up to a computer (Pete do we have the software for this GC?). I'd like to get this GC up and running to help increase the drug lab turn around time.

Please let me know your thoughts and let me know if you have any questions.

Thanks,
Bruce
